ENS name: llc.lexdao.eth

My reasons for wanting to be a delegate: We believe ENS can become a public good not only for Ethereum users making financial transactions with better UX, but can also form the backend for a new legal commons. We will be strong advocates for building ENS into the meta layer for web3 legal systems.

My view on each section of the [proposed ENS Constitution](#)

 **Public Goods** **ENS Development** **All categories**▼ **Tags**

- Name ownership is an absolute right: Agree
- Registration fees exist as an incentive mechanism: Agree
- Income funds ENS and other public goods: Agree
- ENS Integrates with the global namespace: Agree

My web3 qualifications / skills: We have been long-time users of the Ethereum blockchain to host our legal agreements and execute commitments. We are a DAO of legal engineers with international representation that develop and deploy Ethereum smart contracts to automate business operations. Our delegate application, `llc.lexdao.eth`, is a Delaware series LLC hosted in a 3/5 gnosis multi-sig that currently administers escrows and our certification NFTs.
